	E REPLY FILED <u>29 October 2007</u> FAILS TO PLACE THIS APPLICATION IN CONDITION FOR ALLOWANCE.						
1. 🗀	The reply was filed after a final rejection, but prior to or on this application, applicant must timely file one of the follow places the application in condition for allowance; (2) a No a Request for Continued Examination (RCE) in compliance time periods:	wing replies: (1) an amendment, aff otice of Appeal (with appeal fee) in c	idavit, or other evider compliance with 37 C	ce, which FR 41.31; or (3)			
a)	The period for reply expires <u>3</u> months from the mailing date	e of the final rejection.					
b)	The period for reply expires on: (1) the mailing date of this Advisory Action, or (2) the date set forth in the final rejection, whichever is later. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of the final rejection.						
	Examiner Note: If box 1 is checked, check either box (a) or (b). ONLY CHECK BOX (b) WHEN THE FIRST REPLY WAS FILED WITHIN TWO MONTHS OF THE FINAL REJECTION. See MPEP 706.07(f).						
have unde set fo may i	Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee lave been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as let forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, hay reduce any earned patent term adjustment. See 37 CFR 1.704(b).						
2. [The Notice of Appeal was filed on A brief in comp filing the Notice of Appeal (37 CFR 41.37(a)), or any exte a Notice of Appeal has been filed, any reply must be filed	nsion thereof (37 CFR 41.37(e)), to	avoid dismissal of th	ns of the date of e appeal. Since			
	NDMENTS						
3	The proposed amendment(s) filed after a final rejection, (a) They raise new issues that would require further co	but prior to the date of filing a brief,	, will <u>not</u> be entered b	ecause			
	(b) They raise the issue of new matter (see NOTE belo	ow):	TE below),				
	(c) They are not deemed to place the application in bet appeal; and/or		ducing or simplifying	the issues for			
	(d) They present additional claims without canceling a NOTE: (See 37 CFR 1.116 and 41.33(a)).		ected claims.				
	The amendments are not in compliance with 37 CFR 1.1.	21. See attached Notice of Non-Co	mpliant Amendment	(PTOL-324).			
	Applicant's reply has overcome the following rejection(s)						
	Newly proposed or amended claim(s) would be allowable if submitted in a separate, timely filed amendment canceling the non-allowable claim(s).						
7	For purposes of appeal, the proposed amendment(s): a) will not be entered, or b) will be entered and an explanation of how the new or amended claims would be rejected is provided below or appended. The status of the claim(s) is (or will be) as follows:						
	Claim(s) allowed: Claim(s) objected to:						
	Claim(s) rejected to:		•				
	Claim(s) withdrawn from consideration:						
	DAVIT OR OTHER EVIDENCE						
8	The affidavit or other evidence filed after a final action, bu because applicant failed to provide a showing of good an was not earlier presented. Continuation of 11. does NOT place the application in condition for allowance because: applicants argue that the cited references do not disclose "that the enveloping member is heated and pressed in a portion where the core member is present within the enveloping member, and at portions of said enveloping member where said core member is not present with the enveloping member". However, this is not convincing of patentability because the fact that the product is "heated" and "pressed" does not add any structural features to the claimed product. Furthermore, the fact that something is heated and pressed does not necessarily require that a physical change, i.e. a heat seal, has occurred. Concerning the limitation "wherein the portions of said heat seal layer where said core member is not present with the enveloping member are closely attached to each other and heated and fused so as to be along the core member shape at the border between the portion ... not present", the references each disclose this feature. For example, the borders of the enveloping material in the references are heat sealed together around the core material. These borders areas in the references' product may be considered "portions of said heat seal layer where the core member is not present within the enveloping member" and they are also along, i.e. next to. the "core member shape". The inner portion of the heat sealed borders next to the core material may be considered to be along the core member at the border between the core member and a portion where the core member is not present within the enveloping member, namely the outer portions of the heat sealed borders. As such, claim 2 is anticipated by each reference. Regarding applicants discussion of claims 8-10 and the rejection under 35 USC 103, the rejections set forth in the previous office action do set forth reasoning to support the conclusion of obviousness. Specifically, that it would have been obvious to one of ordinary skill in the art to provide a hole in the products of the primary references in view of the teachings in the secondary reference in order to allow a tube to pass throught the insulation after installation. Applicants' discussion of the '686 product as being "welded" is also not convincing. In the final products a welded joint is patentably indistinct from a heat sealed joint. Furthermore, it is noted that "686 describes heat joining the resin layers by welding with heating, i.e. heat sealing. This welding with heating around the holes in the reference's product results in heat sealed layers which are fused over portions of the holes in the core material and along the shape of the through holes as instantly claimed.
